OF CURLY GIRL FARM

THE TILMOR STORY

The Tilmor story has deep roots in agriculture and manufacturing. Over four generations of the Marvin and Mary Steiner family have farmed in the rolling hills of Northeast Ohio and have extensive experience with international agriculture. This history enabled the family to better understand the unique needs of farmers around the corner and across the globe. A strong mechanical aptitude helped them to solve problems on the farm and led to the eventual creation of several modern manufacturing businesses.

Today the Tilmor team is committed to support growers with tools and equipment they need to grow healthy and wholesome food for their families and communities.

TILMOR POWER OX

THE TWO-WHEEL TRACTOR

Conquer weeds and increase production with the Power Ox. Designed for planting, cultivation, and light hilling, the Power Ox is a great compliment for growers that already have primary tillage machines. One person can switch between implements by removing a single pin with no need for tools. Minimal assembly required.

TILMOR TRACTOR

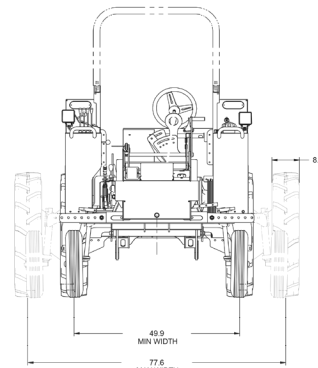

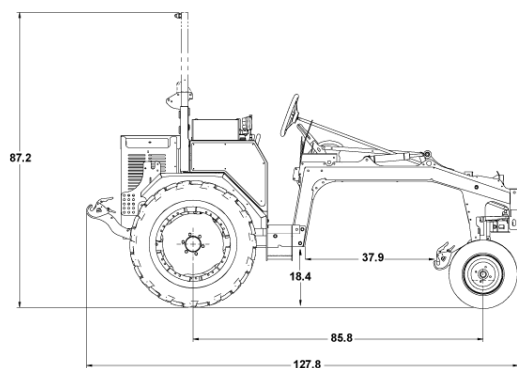

THE ULTIMATE ROW CROP TRACTOR

We, at Tilmor, are bringing back the art of cultivation with a vision for versatility and growth. The Tilmor 520 Series tractors are the ultimate row crop tractors for diversified farming operations and can be adapted to a multitude of crops and cultural practices. The Tilmor 520 Series tractors allow repeatable, predictable, profitable, and scale-able organic practices for growers to reduce manual labor and costly downtime.

SAFETY FEATURES

- 1 • Standard fold down roll bar and seat belt
- Operator Safety Interlock System
- Shield and guards to cover critical heat and safety areas

CONVENIENCE

- 2 • Implement depth control for accuracy and easy depth setting
- 3 • Conveniently located 2" receiver tubes for easily modifying and customizing your tractor
- 4 • Operator's toolbox with USB port for charging your devices
- Ergonomic design

STANDARD FEATURES

- 5 • Front Toolbox
- 6 • Hydraulic lift/operation of mid and rear implements
- 7 • Front and Rear Wheel adjustments from 50" on center to 78" on center in 2" increments (per side)
- Synchronized manual transmission
- 8 • Automotive-style disk brakes on rear wheels. Separate brake pedals for sharp right or left turns.
- Automotive-style sealed electrical system
- 12V, 550CCA Battery

PREMIUM FEATURES

	• Cultivation Lights	Includes two 13" long LED lights mounted flush on each side of the front frame providing optimum working light for belly mounted implements. *Requires AT-9084	AT-9046	\$155
9	• Work Lights	Includes four LED 4" x 4" wide flood lights. Two forward and two rear facing lights located on the tractor fender. *Requires AT-9084	AT-9047	\$361
10	• Front Receiver Hitch	Bolt on kit for a front mount receiver hitch for 2" x 2" square tubing.	AT-9049	\$79

BASKET WEEDING

BASKET WEEDER ●●●

The Tilmor Basket Weeder is typically used for inter-row weeding. The wire baskets are spaced apart to allow for the crop row to pass between. Basket weeders may also be used to prepare a stale seedbed by placing the baskets together and running over the entire width of a seedbed.

TINE WEEDING

EINBOCK TINE WEEDER ●

Set yourself up for success with the Einbock tine weeder, specifically designed to uproot weeds in the 'white thread' stage. Its numerous adjustments allow for use in many different crops both in pre-emergence and post emergence stages. Adjusting the gauge wheels and tine angle allows the steel tine to 'dance' through the soil and around the crop while burying and 'flicking' out emerging weeds at the hair stage across the entire working width.

WIDTH

Height Adjust Clamp (2)	AA-9059	\$52 (ea)

TORSION WEEDER ●●●

The torsion weeder is perfect for uprooting weeds through shallow cultivation in the crop row.

- Good with loose soil
- Not suitable for heavy soil that is too hard
- Optimum weed stage: Cotyledon to 2-leaf
- Optimum Crop Size: Well-rooted crops until the crop canopies
- Suitable for most crops planted in rows with a row spacing of 10" and up

FARMER'S SPOTLIGHT

KRISTEN BAUGHMAN

➤ OF CURLY GIRL FARM ➤

From the time that she was young, Kristen Baughman, also known as Curly Girl, found herself in the fields. At the age of thirteen, she started working as a farm hand, and this job continued through high school and college. As her love for farming grew, Kristen set her passion into motion and started her own farm.

Curly Girl Farm is rooted in Zanesville, Ohio, where Kristen lives in a historic 1848 home. Her interest in history and her creative nature transformed the farm into a unique operation for heirloom vegetables and aesthetic market stands. A three-acre plot next to her home is where the majority of the growing happens,

including leafy greens, green beans, cucumbers, zucchini, bell peppers, eggplant, sweet corn, squash, and tomatoes. She also produces vegetables on two to three acres of land off of the property.

Beyond vegetables, Kristen has a flower patch full of sunflowers, dahlias, celosia, and zinnias, just to name a few. She hosts "Cut Your Own" events when the flowers are in season, where people come to Curly Girl Farm, pick and cut their own flowers from the patch, and assemble them into a bouquet. At these events, Kristen treats her guests to appetizers with ingredients grown on her farm.

No matter what she grows, Kristen keeps her produce free of synthetic fertilizers, pesticides, and herbicides. This is a wonderful benefit for consumers, but it does not come without cost for Kristen as keeping her crops weed-free can become a full-time job.

With the help of a part-time farm hand who works in the garden and her mom and aunts who take turns selling produce at farmers markets, Kristen plants, weeds, picks, and sells her products locally. This is no small task to tackle, especially with limited time and equipment.

In 2017, Kristen attended the Tilmor Mechanical Weed Control field day and learned various ways to improve her already successful farm. Through this event, Kristen learned that purchasing an Allis-Chalmers tractor would greatly benefit her, and that is exactly what she did. Coupled with her purchase of the Tilmor Basket Weeder and Finger Weeder, Kristen walked away with the ability to significantly decrease the time and effort necessary to weed her fields.

Now, with the help of mechanical equipment, the weeding process on Curly Girl Farm is more efficient, and Kristen is able to give more of her attention to harvesting her products and transporting them to the markets.

Kristen's passion and the fresh produce that results from it stretches beyond Curly Girl Farm. She is also involved in Urban Greens, a program based in Muskingum County that works to grow urban agriculture, developing community gardens and providing agricultural education for locals.

There is no doubt that Kristen's days are full, but they are equally rewarding. She says, "I'm always amazed when I look around and think my hands produced all of this and I picked all of this. Yeah, it's worth it."

Tilmor is grateful to know Kristen and appreciates the example that she sets of commitment and service!

VINEYARD WEEDING

ADAPTIVE CULTIVATOR SYSTEM

The adaptive cultivator system is a weed control tool for vineyards, trellised orchards, hemp and fence lines.

Using a 26" finger weeder head supported by a flexible torsion arm it requires no electronic or hydraulic input as it works to eliminate weeds in the crop row without damaging the established crop. The fingers are able to run right up to, and around the crop without operator input and does not leave an unworked area like a radius on a grape hoe and the machine excels at working speeds of 4-7mph depending on soil and crop conditions.

Running ahead of the finger weeders are a gang of spyders that work to control weeds alongside the row. Depending on how they are set, they can also be used to move a small amount of soil towards or away from the crop row. These spiders also run on a flexible torsion mount which allows them to adjust to contours on the ground without operator input. A rigid guard designed to deflect vines, trees or other crops protects both the crop and the equipment from damage.

The 80 durometer (yellow) finger weeder head is not recommended for peaches or other trees with exceptionally soft bark, especially when they are young.

2" square tube toolbar or existing 2" square bar-mount required for use.

MOUNTING & UNDERCUTTERS

MOUNTING SYSTEMS

SIDE LIFT

The Thiesen Side Lift is designed to mount between the front and rear wheels of a tractor to provide a side mounting and lifting location for cultivation tools such as the Adaptive Cultivation System or disc hillers. With 16 inches of vertical travel, it provides a convenient way to mount tooling in one of the best locations for control and visibility of equipment.

The side lift will require a custom mounting solution to attach it to the tractor, as well as hydraulic lines of the appropriate length and a single remote valve, but includes the lift cylinder, as well as 2-inch mount for tooling that can be located in a variety of positions.

SM-400-tc

Call for Pricing

ADJUSTABLE TOOLBAR

Designed to be mounted to either a Category I or II rear 3-point hitch, as well as 3 point front hitches. The toolbar can adjust from a width of 1.2m (48") to 2.2m (88") and can carry a variety of tooling from the Adaptive Cultivation System to disc hillers and weed sprayer booms. The included cylinders are plumbed to move together with a single remote valve on the tractor. They can be separated for independent operation.

Gauge wheels can be added for a more consistent depth control.

AT-1200

\$2,703

BEDLIFTER/UNDERCUTTER

Ideal for loosening the soil for harvesting carrots, garlic, parsnips and other root crops.

Use up to 350# (42" Undercutter) and up to 500# (48" Undercutter) on the toolbar to help the undercutter pull down into the soil.

PLASTIC MULCH LAYING & REMOVAL

PLASTIC MULCH LAYER

The Tilmor plastic layer is a modular design for laying 3' and 4' plastic and up to two rows of standard drip tape. The innovative design includes the following features:

- Holds up to two rolls of the plastic drip tape
- Built in carrier for second role of plastic mulch
- Adjustable bed shaper for laying 1 meter, 3' and 4' plastic mulch
- Max. diameter of plastic rolls: 9-1/4"
- No tools required, easy adjustment for tire tension and closing discs
- Integrated holder for carrying a standard ground shovel
- One drip tape trencher AB-9011

• Optional Plastic Mulch: 1 mil., black, 48" wide, 2,400' long, diamond embossed
For proper use it is required to mound up the bed area with hiller discs before using the plastic layer. This package does not include hiller discs.

Plastic Layer	AB-9010	\$2,544
Category 1 - 64 inch	49-0096	\$324
Tilmor - 64 inch	49-4098	\$295
Additional Drip Tape Roller Mount	AB-9011	\$30 (ea)
Optional Plastic Mulch	PA-9060	\$77 (ea)

PLASTIC WINDER

The ground driven reel allows for consistent tension on the plastic at any speed. No more adjusting the ground speed to reel speed!

The unique belt drive spins the reel backwards which helps shed the majority of dirt and plant debris. This keeps organic matter on your farm, not in the landfill.

The plastic winder is able to wrap up to 600' of 4' plastic at a typical collection speed between 3/4 - 3 mph.

For best results, keep the edge of your plastic weed free and mow off any tall or bulky crop residues and wrap drip tape with the plastic mulch.

This requires the Plastic Lifter or alternative lifting system and a 2" toolbar for installation and operation.

48-11400

\$2,700

PLASTIC LIFTER

Two 20" notched blades gently cut underneath and lift the plastic. The blades can be easily attached to a 2" toolbar via U-bolts for maximum adjustability.

It can be used on 4' and 5' wide plastic.

49-0053

\$800

PLASTIC LIFTER/WINDER COMBO

The Plastic Lifter and Winder system will allow you to lift and wind plastic at the same time on standard 3" to 4" raised beds. Taller beds may require separate lifting and winding operations.

This system can be used on low horsepower tractors down to 20 horsepower.

The lifter has a wide adjustment range, allowing you to fit the width of your plastic (3 ft., 4 ft. or 5 ft.). The plastic winder is ground driven, meaning that whatever speed you're traveling, the winder is spinning appropriately. The winder also spins in a direction that allows for dirt and debris to be shed from the plastic as it winds.

TOOLBARS, MODBARS & MORE

TOOLBARS FOR POWER OX/ PLANET JR/SIMPLICITY/ WATERLOO •

Standard toolbar fits both original Planet Jr B series tractors as well as the Power Ox.

Upgraded front hitch will allow it to attach to a Simplicity or Waterloo tractor as well.

Bolt together design allows for flatter packing, as well as two different lengths. Toolbar is made of 5/8x1-1/4 steel.

TOOLBAR SIZE

21 Inch	WB-PJ535	\$137
27 Inch	WB-PJ685	\$148
52 Inch	WB-PJ1320	\$172

TOOLBAR ADD-ONS

Simplicity/Waterloo Hitch Upgrade	WB-SWH	\$26
-----------------------------------	--------	------

GAUGE WHEELS •

Improve your depth control and implement tracking with a pair of gauge wheels. Gauge wheels are recommended for most cultivation setups.

WHEEL TYPE

Adjustable	WB-PJAGW	\$210
Fixed	WB-FGW	\$149

GAUGE WHEEL CLAMP •

• Clamps Thiessen Tillage Equipment Adjustable Gauge Wheels to 1.5" Square Toolbars.

AA-9063	1.5"	\$29
---------	------	------

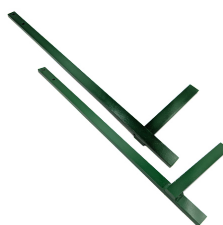

CROSS BARS •

Allows for a second row of tooling on a toolbar. Typically attached to the trailing arms using the standard cross clamps. If needed a third row could be added as well, although this will make the cultivator quite heavy.

BAR LENGTH

21 Inch	WB-CB535	\$22
27 Inch	WB-CB685	\$26

TRAILING ARMS •

30" long with a 10" leg used in most cultivator setups. Typically, the shorter leg will be attached to the main toolbar, with gauge wheels attached at the back of the trailing arms and a cross bar in the center if additional tooling that will not fit on the main hitch is needed. Sold in a pair.

WB-TA760	\$57
----------	------

TRAILING ARM MOUNT • •

The Trailing Arm Mount provides a simple way to stack tools and add flotation for cultivation implements.

Stacking tools allows for more effective weed control.

Flotation is important when cultivating multiple rows and/or uneven ground to provide optimal ground contact for implements such as Finger Weeders and Vegetable Knives.

Adjust the desired amount of downward pressure by changing the tension on the torsion springs.

AW-9044	\$140
---------	-------

MID-HITCH •

Used mostly commonly in conjunction with the wide 52" toolbar, this kit allows you to mount tooling for the center row, offset back from the outer two rows. Clamps, instead of a welded hitch, allow for adjustment of the spacing between the forward bars to accommodate different types of tooling. Includes two Standard Cross clamps, two 14" legs and one 18" hitch.

WB-MH460	\$57
----------	------

44LB/20KG WEIGHT WITH LATCH • •

The Tilmor 44 pound suitcase weight is designed to conveniently hang on any standard 2" square tube. The spring loaded safety latch ensures the weight remains on the toolbar even in rough terrain. This unique weight can be used with any 2" toolbar or serve as a tractor weight.

AT-9001	\$74
---------	------

TOOLBAR FOR POWER OX/ PLANET JR. FOR 1.5" TUBE ●

SEEDERS

JANG FOR TRACTOR

This one row mountable Jang is a simple solution for s consistent, and accurate seeding. Seed rollers are easy to change and adjust.

- Mounts to 2" Square Toolbar, no tools required
- Max. recommended planting speed: 1.7 mph
- Spring loaded scissor hitch with approx. 3" of float
- Quick release hopper
- Clear, durable plastic hopper to view seed level
- Hopper volume = 0.26 gal
- Adjustable depth control
- Singulates and spaces small seeds; saving time and money
- Seed sizing gauge on hopper lid for ease of roller selection
- Uses special anti-static plastic rollers to prevent seeds from clinging
- Weighs 30 lbs.

JPH-U **One Row** **\$998**

JANG SEEDER - PUSH

The Jang one row push seeder is a simple solution for a consistent, and accurate seeding. Seed rollers are easy to change and adjust.

- Adjustable handle for both height and offset
- Quick release hopper
- Clear, durable plastic hopper to view seed level
- Hopper volume = 0.26 gal
- Adjustable depth control
- Singulates and spaces small seeds; saving time and money
- Seed sizing gauge on hopper lid for ease of roller selection
- Uses special anti-static plastic rollers to prevent seeds from clinging
- Weighs 25 lbs.

JP-1 **One Row** **\$440**

SEED ROLLERS

Each seeder includes one seed roller of any size, and each additional roller is \$30. Call or visit Tilmor.com to learn more about what seed roller works best for your operation.
