

STEERABLE CULTIVATOR

3 PT. PRECISION CULTIVATION

Increase precision, on the back of any Cat I or II tractor, from the comfort of an adjustable seat position.

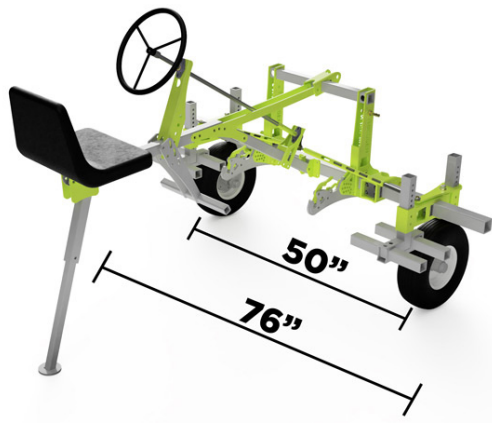

EASY CHANGE TOOLBAR

The cost of having a steerable unit for each cultivation tool can add up. With our easy change toolbar, use the same steerable frame for every tool you need.

INCREASE PRODUCTIVITY

Eliminate more weeds in less time while reducing crop damage with precise tool cultivation.

TRACK WIDTH ADJUSTABLE

Easily adjust tire width from 50" to 76" from tire center to tire center.

FIXED/FLOAT ARM POSITION

The fixed arm position will keep a set depth on the toolbar for implements that have float systems, for example the parallel cultivation units. The float arm position is great for tools that do not move up and down on their own, for example the basket weeder.

SPECS

Ground Clearance	20-26in 50-66cm
Toolbar	Standard 2in Toolbar (50.8mm)
Hitch Type	Category I and II Compatible
Wheel Width	Adjustable 50-76in 127-193cm

QUICK CHANGE TOOLBAR

Easily open and close hitch pins to switch implements seamlessly.

ADJUSTABLE SEAT & SUPPORT LEG FOR STORAGE

Set the seat position and foot rest for operator comfort.

The support leg can be pinned up during use or down for easy storage.

TIRE TRACK ERASER MOUNT

Keep tire track sweeps with the steerable cultivator while other implements change.
