

# **TILMOR** **FINGER WEEDING**

Discover optimal weed control throughout the season by pairing Finger Weeders with A-Blades. This combo breaks through crust and kills weeds between plant rows with A-Blades, then uproots small weeds in the plant row with Finger Weeders. The Fingers Weeder's ground engaging steel drive plate turns the flexible polyurethane fingers at a faster speed to "flick" out emerging weeds at the hair stage.

- Suitable for most crops planted in rows with at least 10 inches between each row
- Effective on light to medium-heavy clay soils
- Optimum weed stage: Cotyledon to 2-leaf
- Optimum Crop Size: When properly rooted
- Ergonomic design

ASSEMBLY  
INSTRUCTIONS

# FINGER WEEDER KIT OPTIONS

## NUMBER OF ROWS FOR ROW FRAME

- 1, 2, 3, or 4

## ROW SPACING

- Min. of 10"

## FINGER SIZE
