

The Tilmor Plastic Layer features a modular design for laying 3', 4', and 5' plastic mulch, as well as landscape fabric, with the ability to install up to two rows of standard drip tape.

Purchase the plastic layer as a standalone unit with the bed shaper and closing discs, or add the optional hiller discs to form the bed and lay plastic in one pass. Designed for convenience and versatility, the Plastic Layer features easy, tool-free adjustments and integrated storage for extra materials and essential tools.

Note: The bed must be preformed using hiller discs before laying plastic. The optional hiller discs allow you to complete both steps in one pass.

FEATURES

- Multiple mulch widths from 3 to 5 feet
- Holds up to two rolls of drip tape and includes one drip tape burier
- Built-in holder for an additional roll of plastic mulch
- Accommodates plastic rolls up to 9 1/4 inches in diameter.
