

TILMOR TRACTOR MOUNTED DIBBLER

The Tractor Mounted Dibbler creates evenly spaced planting holes or impressions in the soil, making it easy to achieve consistent transplant spacing in bare ground or plastic mulch. With all steel wheel construction, this unit is a robust, durable solution designed for tractor mounting.

FEATURES

- Row Spacings up to 46"
- Plant Spacings from 3" to 41"
- 3" , 4" , 6" , 8" , 10" , 12" , 15" , 22" , or 41"
- Wheels securely clamp onto axle
- Easily move wheels for offset planting
- Ideal for plant spacing when distance between rows is critical such as with a basket weeder

KEEP IN MIND

- Accuracy will vary slightly with soil conditions
- Dibbles can puncture drip tape
- Lift tool when cornering to prevent damage

WHEEL & DIBBLE

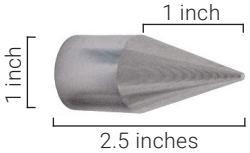

Each row requires one dibbler wheel and mount. For each wheel, you can add 1–4 packs of dibble points depending on your desired spacing.

Each dibbler wheel holds up to 16 dibble points or 4 dibble point packs.

- For 3" spacing: 4 dibble packs/row (16 total points)
- For 4" spacing: 3 dibble packs/row (12 total points)
- For 6" to 10" spacing: 2 dibble packs/row (8 total points)
- For 12" to 41" spacing: 1 dibble packs/row (4 total points)
