

TILMOR SWEEPS & S-TINES

Tilmor S-tines and sweeps provide a versatile foundation for mechanical cultivation. With multiple tine sizes and sweep styles available, growers can configure their setup to match different row spacings, crops, soil conditions, and growth stages.

S-tines use a vibrating action to disturb and mix the top layer of soil, helping uproot weeds and incorporate soil amendments. Their coiled spring design absorbs shock when encountering obstacles, reducing stress on the toolbar and attached implements.

FEATURES

- Moves more soil than precision type cultivation set-ups
- More effective at removing larger weeds than precision tools
- Often used as tire track erasers
- Great late season cultivation tool for canopying crops

STANDARD SWEEPS

- Great to cut and dig into hard, dry soils.
- Fast, aggressive between row cultivation
- 1 Inch to 10 Inch blade widths
- Low crown, high crown and duck foot style options

VEGETABLE/BEET SWEEPS

- Fast, aggressive between row cultivation
- Shallower profile than standard sweeps
- 6 Inch to 16 Inch blade widths

S-TINE SIZE	MOUNTING	TYPICAL USE
9 Inch	1.5 Inch square tube	Walk Behind Implements
14.5 Inch	2 Inch square tube	Tractor Mounted
18.5 Inch	2 Inch square tube	Tractor Mounted
